Press Release

Virtual "Linner" Roundtable - Forget Uncertainty with Zero Trust Unified Access & Control

Athens, Greece – 2 June, 2020 – Pylones Hellas, a provider of advanced IT solutions to medium and large enterprises, with presence for more than 22 years in Greece, Cyprus and the Balkans, successfully organized the first "phygital" online roundtable in collaboration with F5 Networks, as official F5 Gold Unity Partner in Greece & Cyprus. The virtual roundtable focused on the applications used and managed by organizations as well as their management, access and security capabilities.

The virtual roundtable entitled "**Forget Uncertainty with Zero Trust Unified Access & Control**" was attended by IT managers and administrators from a wide range of companies and organizations that aim to simplify and securely manage their applications and systems. Important questions were posed about how an organization can ensure that its remote users remain productive, and their applications secure especially this period that applications are anywhere - from any location - and in fact on different devices, while keeping corporate applications and information secure and all this through the services of Pylones Hellas and the F5 Networks solution platform. The focus was on zero trust access through an identity-aware proxy approach which ensure that there is secure updating to every application access request and simplify access to them from anywhere targeting user's convenience.

Executives of Pylones Hellas and F5 Networks, in addition to analyzing the security of applications at all stages - from code to customer - had the opportunity to present and analyze the implementation of F5 Netwokrs' Access Policy Manager (APM) solution. APM solution allows controlled access to applications based on the environment, and enhance security, usability and scalability. In this context, in order for the participants to have a more complete picture of the solution, 3 different case studies were presented by the customers themselves who belong to different markets (telco, insurance and enterprise) and have successfully implemented the solution in their organizations.

About Pylones Hellas
Pylones Hellas, member of the Cypriot group P.M.Tseriotis Ltd, is active for more than 20 years in the field of digital technologies and internet security.
