

# GLOBAL MANAGED SECURITY SERVICE PROVIDER

SecurityHQ is a Global Managed Security Service Provider (MSSP) that detects, monitors & responds to cyber threats 24/7, to ensure complete visibility and protection.

# Key Services

## Managed Detection & Response (MDR)

**Key Objective-** Powered by real-time log analytics, with security orchestration, automation & response tooling, our MDR service rapidly identifies & limits the impact of security threats.

- **Gain Complete Visibility** of Your Digital World.
- **Visualise and Understand** Malicious or Anomalous Activity.
- **Analyse, Prioritise and Respond** to Threats in Rapid Time.
- **Safeguard** your Data, People, and Processes.

**Key Objective-** To keep up with new threats, businesses now require different combinations of detection and response capabilities. We offer XDR with multiple feature options, to ensure an enhanced security posture specific to your needs. Features include MDR, UBA, EDR, Network Flow Analytics, & Dark Web Monitoring for an improved SIEM Experience combined for multi-layer protection.

## Managed Extended Detection & Response (XDR)

- **Advanced Threat Prevention & Detection** with Comprehensive View of Risks via Real-Time Monitoring and Alerting.
- **Rapid Onboarding** with Industry Experts.
- **Cost Saving** - No Need to Build Internal SOC Capabilities or Maintain the Required Tools.

## Digital Forensics & Incident Response

**Key Objective-** Knowing what has happened and what is happening in your IT infrastructure is essential to contain and recover from cyber-attacks. With a comprehensive digital forensics service, combined with dynamic threat hunting, take proactive actions to discover and contain threats, and speed up recovery.

- **Retrieve Crucial Information** for Effective and Faster Response.
- **Safeguard Data and Prioritise Time** So That the Most Vital Tasks are Selected.
- **Know Who is Targeting You**, From Any Geolocation.
- **Reassure Management** of Proactive Steps to Contain Security Threats.

## Managed Microsoft Sentinel

**Key Objective-** Managed Microsoft Sentinel is the industry-leading solution for businesses to protect against all forms of cyber threats. Sentinel SIEM tool, together with our skills, analytics, and security orchestration, delivers the highest degree of threat detection and incident response.

- **Collect Data at Cloud Scale** and identify previously undiscovered threats.
- **Respond to Incidents Rapidly** with built-in orchestration and automation of common tasks.
- **Identify Anomalous and Malicious Patterns** with automated recovery systems.
- **Up or Down-Scale Automatically**, to meet your organisations specific needs.

**Key Objective-** Continually monitor endpoints, gain full visibility of your whole IT environment, detect incidents, mediate alerts, stop breaches, and receive instant advice. 24/7 SOC monitoring to detect advanced threats with thorough forensics and rapid root cause analysis.

## Managed Endpoint Detection & Response (EDR)

- **Identify the Full Scope** of an Attack with Advanced Correlation and Proactive Threat Hunting.
- **Real-Time Identification**, Without Signatures, to Monitor & Prioritise Potential Threats.
- **Fully Managed Service** to Reduce the Cost of IR, with More Effective Remediation.
- **Complete Endpoint Visibility** of Continuous Monitoring for Transparency of all Systems and Processes.

## Vulnerability Management as a Service (VMaaS)

**Key Objective-** VMaaS ensures that organisations accurately detect, classify, and contextualize vulnerabilities, with designed & prioritized remediation programs, for full-proof vulnerability, compliance, and patch management.

- **Auditable Collaboration**, Processes and Applicable Synopsis and Carefully Crafted Reports.
- **Accurate Prioritisation** by Identifying Key Areas of Concern, therefore Reducing Recovery Time for Remediation.
- **Identify and Map your Businesses Risk-level** to Cyber Threats. Round the Clock Support for Scheduling, Monitoring, Analysis & Reporting of Scanning Activities.
- **Visibility to Stakeholders** by Highlighting Your Businesses Attitude Towards Cyber Security.

## Common Customer Challenges and How We Solve Them

### Challenges

### Our Solutions

A lack of **Visibility** and awareness.

By visualising risky behaviour and misconfigurations, target the threat at its source, for **Complete Visibility & Peace of Mind**.

Cost and **Risk Reduction**.

Likelihood of a breach is reduced & **24/7 Detect & Response** delivered at a fraction of the cost of DIY.

Peace of mind... **Assurance**.

The **Capacity and Capability** to deliver bespoke services at scale, via combined threat intelligence and human expertise.

A need for **Rapid Response**.

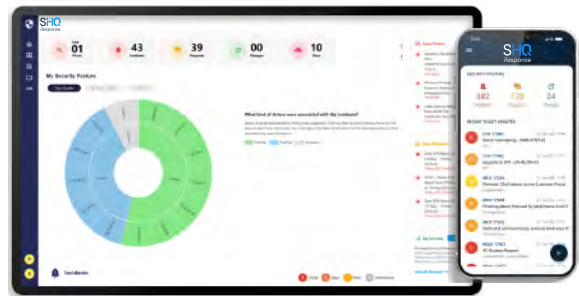

**Incident Response playbooks, SOAR platform, and Certified Incident Handlers** to contain threats and watch your back!

A **Partner** to depend on.

A partnership that works as an **Extension of Your Team**, to expose patterns of illicit behaviour and reduce risks.

## SHQ Response

SHQ Response, Incident Management & Analytics Platform and award-winning mobile app is at the core of all our services, so that we work in collaboration with you, to visualise, prioritise, connect and respond to your specific security needs.

## About Pylones

Pylones Hellas is a leading company in the Greek ITC market. Since its establishment in 1997, Pylones has strategically focused on meeting the needs of modernizing private sector infrastructure. Moving steadily and carefully, the company succeeded in forming one of the largest Information Technology, Communications and Security Systems Integrators in Greece. Having completed two decades of successful operation with constant evolution, Pylones today has the required knowledge and experience to provide its customers with integrated technology solutions with high added value.
